ALAN MOULDER - ENGINEER/PRODUCER

I love them for balancing mixes, and vocals in particular. The bass detail and speed is quite staggering for a small cabinet, my mixes translate extremely well once they leave the studio. The Rocks do exactly what Unity Audio claim, they are 'Brutally Honest!'

Credits include: My Bloody Valentine, Foo Fighters, Death Cab for Cutie, Them Crooked Vultures, Nine Inch Nails, The Killers, Interpol

STEVE POWER - PRODUCER

The detail is amazing, I can hear everything so precisely for tracking and mixing and so I feel totally confident when I'm making critical decisions about balancing mixes

Credits include: Robbie Williams, Kylie Minogue, British Sea Power, Joe Cocker, Tom Jones

MIKE CROSSEY - ENGINEER/PRODUCER

I wasn't even in the market for a pair of monitors until I heard The Rocks. The soundstage on them is huge though unhyped and true

Credits include: Arctic Monkeys, Razorlight, Foals, The Kooks, Black Keys
